

Genuine KAESER Parts

Why use genuine KAESER parts?

Compressed air plays a vital role in ensuring optimum efficiency in many of today's work and production processes. However, the demands placed on a modern compressed air supply system can be met only if compressed air is available where and when it's needed in the correct quality and quantity. Moreover, this should be implemented as cost-effectively as possible. One of the other key criteria for any efficient compressed air system is that it should also ensure maximum availability. KAESER compressed air equipment is specifically designed with these needs in mind, but even the best systems can't last indefinitely without expert service and maintenance. Use the experience and knowledge of our highly qualified specialists to your advantage and benefit from the quality of genuine KAESER parts: all KAESER products, consumables and spare parts are quality tested to ensure best possible performance. Be safe in the knowledge that all components are guaranteed and designed to meet the demands of the applicable operating conditions. Long-term compressed air system efficiency and reliability can be ensured by using only genuine KAESER parts. KAESER's Customer Service and Service Partners provide fast, reliable delivery of all maintenance and replacement parts. Furthermore, components are available for many years after initial system investment.

Unrivalled performance and efficiency with genuine KAESER parts

ORIGINAL

Choose reliability

KAESER's service personnel use only genuine maintenance and spare parts with proven durability to ensure unrivalled reliability and long service life.

Only KAESER original parts guarantee tested quality.

Sigma Fluid

KAESER's advanced SIGMA FLUID coolant not only ensures exceptional wear-protection and lubrication (even at low temperatures), but also simplifies condensate treatment.

Exchange airends

KAESER's exchange airends are manufactured using the very latest production processes. Thanks to precision casing measurement and bearing adjustment, they deliver the same quality, efficiency and durability as a brand new airend.

Service kits

Our decades of experience have shown us that some parts require scheduled replacement as part of regular system maintenance. KAESER service kits include all necessary components.

Filter elements

Genuine KAESER filter elements guarantee highly effective filtration and minimal pressure drop. Newly designed coalescence filters ensure optimum performance even at low flow rates.

Activated carbon filters

KAESER activated carbon filters ensure quality condensate treatment in accordance with the most stringent water purity regulations. They combine long service life with consistent filtering performance.

Separator cartridge kits

A kit is available for each model in the KAESER compressor range and contains the appropriate gaskets and separator cartridges. Only genuine KAESER separator cartridges ensure lowest possible remaining oil content.

Air filter elements

Generously sized air filter elements protect the airend from being damaged by solid particles. This significantly enhances compressor service life.

Service agreements

for maximum system reliability and value retention

KAESER is represented throughout the world by highly experienced in-country subsidiaries and qualified partners. KAESER's global service network and advanced logistics systems ensure that every customer, no matter where, can rely on fast, reliable delivery of genuine KAESER spare parts.
